PROSOCO

Polished concrete floors are LOW maintenance, they are not NO maintenance. Your new Consolideck floor has a density, hardness and appearance unmatched by any other floor of its kind. With proper care it will last the life of your building. But like anything else --your car, your house, even you! -- your Consolideck floor needs a little attention from time to time to make sure it's in peak condition.

This video has some tremendously useful insights about how to keep polished concrete floors as gleaming and glossy as when they were installed. The video starts with an example of a 4-year-old fitness center floor that still looks as good as day one.

Watch this video if you have polished concrete floors, or are thinking of getting them. Also watch if you do floor maintenance, or are thinking of getting into floor maintenance.
